General

Is your service LLR P&P compliant?

This is a good question. We followed LLR P&P when we created the service so in that regard yes. The two biggest thing to watch out for are that retailers cannot have an on-line store where you accept payments and that all invoicing and payments are ran through Bless. When invoicing from our system all transactions are run through Bless we have just automated it for your convenience.

Unique solution ID: #1124
